EDUCATION

VIT Vellore

B.Tech in Computer Science with specialization in AI/ML

- Grade: 9.49

Vellore, Tamil Nadu

2023 – 2027

EXPERIENCE

Retailcloud – Software Engineering Intern

May 2026 – Jul 2026

- Worked alongside Frontend (Angular), Backend (Java Spring Boot), and Android (Kotlin) engineering teams under mentorship, implementing guided tasks while gaining practical experience with enterprise development workflows.
- Designed and developed a microservices-based Restaurant POS prototype using Spring Boot, implementing JWT authentication, an API Gateway, and OpenFeign inter-service communication.
- Integrated WebSockets for real-time bi-directional order updates, RabbitMQ for asynchronous event-driven messaging, Razorpay API for secure payments, and Docker for containerized deployment.

CodeChef - VIT Student Chapter – Senior Core

March 2024 – Feb 2026

- Developed responsive frontend interfaces and a custom Chrome extension to optimize user interactions and add utilities for the university ecosystem.
- Engineered hardware prototypes using Arduino microcontrollers and co-organized Clueminati'24, a flagship event for the Gravitas national technical symposium.

PROJECTS

Cortex AI — AI Agent Study Platform | React, FastAPI, LangGraph, Gemini, Groq, ChromaDB, Cloudinary

June 2026

- Architected an Agentic RAG pipeline combining ephemeral ChromaDB stores, query translation, and Cohere vector reranking, backed by a semantic Sufficiency Judge triggering Tavily search fallbacks.
- Built a stateful LangGraph backend to process Cloudinary-hosted PDFs, generating persistent interactive flashcards and automated PDF revision sheets grounded in the user's uploaded context.
- Engineered a multi-key LLM routing system (dual Gemini keys, Groq) to bypass rate limits during intensive reasoning, and integrated human-in-the-loop interrupts to securely insert study schedules via Google Calendar API.

TaskForge — Gamified Task Management | React, Node.js, Express.js, Supabase, Redis, Docker, Render

May 2026

- Engineered a Node.js/Express and PostgreSQL backend for a gamification engine — real-time XP/leaderboard updates, timezone-aware cron jobs for streaks and quests, plus a JSON-rule-driven badge engine.
- Built an interactive React/TypeScript Kanban app with drag-and-drop tasks, an integrated Pomodoro timer and lo-fi player, and Google OAuth 2.0 with CSRF-protected state handling.
- Integrated Google Gemini for weekly AI progress reports with graceful fallback on failure, and built a hybrid Redis/PostgreSQL leaderboard with O(log N) real-time rankings.

EventsOrg MCP — AI Event Management System | TypeScript, Node.js, SQLite, MCP SDK, Twilio

March 2026

- Built and published an open-source Node.js MCP server to NPM and the official MCP Registry, giving LLMs operational control over live events via 20+ custom tools
- Implemented dual transport modes (stdio and HTTP/SSE), enabling zero-config local integration with any standard MCP client (e.g., Claude Desktop, Cursor) as well as remote cloud deployment
- Integrated real-time external data sources including Google Sheets, Google Maps, and OpenWeather APIs, among other tools, to drive autonomous AI decision-making

TECHNICAL SKILLS

Languages: Python, C, C++, Java, SQL, HTML, CSS, JavaScript

AI/ML: Exploratory Data Analysis, Scikit-Learn, Transformers, FineTuning LLMs, Langchain, RAG, LangGraph, MCPs

Web: React JS, Node JS, Fast API, ExpressJS, Streamlit, Angular, Spring Boot

Tools: Git, GitHub, Jupyter Notebook, Conda, Postman, Docker

CERTIFICATIONS

- **AWS Cloud Quest: Cloud Practitioner Training** – AWS Skill Builder
- **McKinsey Forward Learner's Program** – McKinsey & Company
- **GEN AI Using IBM WatsonX** – IBM
- **Fundamentals of Deep Learning** – NVIDIA
- **Machine Learning Specialization** – DeepLearning.AI, Stanford University

Issued Jun 2025

Issued Sep 2024

Issued Jul 2024

EXTRACURRICULARS

- **1st Place – ACM Code2Create Hackathon 2025:** Developed Awaaz, a VR+AI presentation rehearsal tool with real-time NPC feedback. *Stack: React.js, Node, Express, Unity (OpenXR), Supabase, OpenAI, ElevenLabs.*
- **Merit Rank Holder:** Recognized for academic excellence within the B.Tech Computer Science cohort at VIT Vellore.
- **Volunteer:** Managed registration and reception logistics for Gravitas'24, VIT's annual technology festival.
