EDUCATION

VIT Vellore

B.Tech in Computer Science with specialization in AI/ML

- Grade: 9.49

Vellore, Tamil Nadu

2023 – 2027

EXPERIENCE

Retailcloud – Software Engineering Intern

May 2026 – Jul 2026

- Engaged in a cross-functional engineering rotation across Frontend (Angular), Backend (Java Spring Boot), and Android (Kotlin) ecosystems, collaborating with product teams to adapt to enterprise workflows and DevOps practices.
- Designed and developed a microservices-based Restaurant POS prototype using Spring Boot, implementing JWT authentication, an API Gateway, and OpenFeign inter-service communication.
- Integrated WebSockets for real-time bi-directional order updates, RabbitMQ for asynchronous event-driven messaging, Razorpay API for secure payments, and Docker for containerized deployment.

CodeChef - VIT Student Chapter – Senior Core

March 2024 – Feb 2026

- Developed responsive frontend interfaces and a custom Chrome extension to optimize user interactions and add utilities for the university ecosystem.
- Engineered hardware prototypes using Arduino microcontrollers and co-organized Clueminati'24, a flagship event for the Gravitas national technical symposium.

PROJECTS

Cortex AI — AI Agent Study Platform | React, FastAPI, LangGraph, Gemini, Groq, ChromaDB, Cloudinary

June 2026

- Architected an Agentic RAG pipeline with ephemeral ChromaDB vector stores per session meanwhile using a semantic Sufficiency Judge to trigger Tavily web search fallbacks.
- Built a stateful LangGraph backend to process Cloudinary-hosted PDFs, generating persistent interactive flashcards and automated PDF revision sheets grounded in the user's uploaded context.
- Engineered a multi-key LLM routing system (dual Gemini keys, Groq) to bypass rate limits during intensive reasoning, and integrated human-in-the-loop interrupts to securely insert study schedules via Google Calendar API.

TaskForge — Gamified Task Management | React, TypeScript, Node.js, Express, PostgreSQL, Redis, Docker

May 2026

- Architected a Node.js and PostgreSQL backend utilizing timezone-aware cron jobs to asynchronously evaluate core game mechanics like XP, streaks, and daily quests.
- Developed an interactive React Kanban platform featuring a built-in Pomodoro timer, lo-fi player, and secure Google OAuth authentication.
- Integrated Google Gemini for automated weekly progress summaries alongside Redis caching and Docker for containerized deployment.

EventsOrg MCP — AI Event Management System | TypeScript, Node.js, SQLite, MCP SDK, Twilio

March 2026

- Built an open-source MCP server exposing 20+ tools that give LLMs operational control over live events
- Implemented dual transport modes: stdio for local Claude Desktop integration and HTTP/SSE for cloud deployment, allowing any standard MCP client to connect
- Integrated Google Sheets live dashboard, Google Maps walking directions, and OpenWeather alerts as data sources for the AI

TECHNICAL SKILLS

Languages: Python, C, C++, Java, SQL, HTML, CSS, JavaScript

AI/ML: Exploratory Data Analysis, Scikit-Learn, Transformers, FineTuning LLMs, Langchain, RAG, LangGraph, MCPs

Web: React JS, Node JS, Fast API, ExpressJS, Streamlit, Angular, Spring Boot

Tools: Git, GitHub, Jupyter Notebook, Conda, Postman, Docker

CERTIFICATIONS

- **AWS Cloud Quest: Cloud Practitioner Training** – AWS Skill Builder *Issued Jun 2026*
- **McKinsey Forward Learner's Program** – McKinsey & Company *Issued Jun 2026*
- **GEN AI Using IBM WatsonX** – IBM *Issued Jun 2025*
- **Fundamentals of Deep Learning** – NVIDIA *Issued Sep 2024*
- **Machine Learning Specialization** – DeepLearning.AI, Stanford University *Issued Jul 2024*

EXTRACURRICULARS

- **1st Place – ACM Code2Create Hackathon 2025:** Developed Awaaz, a VR+AI presentation rehearsal tool with real-time NPC feedback. *Stack: React.js, Node, Express, Unity (OpenXR), Supabase, OpenAI, ElevenLabs.*
- **Merit Rank Holder:** Recognized for academic excellence within the B.Tech Computer Science cohort at VIT Vellore.
- **Volunteer:** Managed registration and reception logistics for Gravitas'24, VIT's annual technology festival.
